**10 for 25¢ - 60 for \$1.00**

Enclosed for Ixia & Ranunculus.....

#### DUTCH IRIS (ALL ZONES)

**See separate folder.**

TOTAL ENCLOSED FOR STOCK.....

**PLUS POSTAGE - - 50c**  
(SEE EXPLANATION AT THE RIGHT)

GRAND TOTAL ENCLOSED.....

## GENERAL INFORMATION

It will speed up the handling of your order considerably if you will use the order blank provided.

Since our stock is perishable, we do not ship C.O.D. Please send your remittance with your order. All stock is guaranteed to be satisfactory upon arrival or money will be cheerfully refunded.

### OUR LIBERAL THREE-WAY GUARANTEE

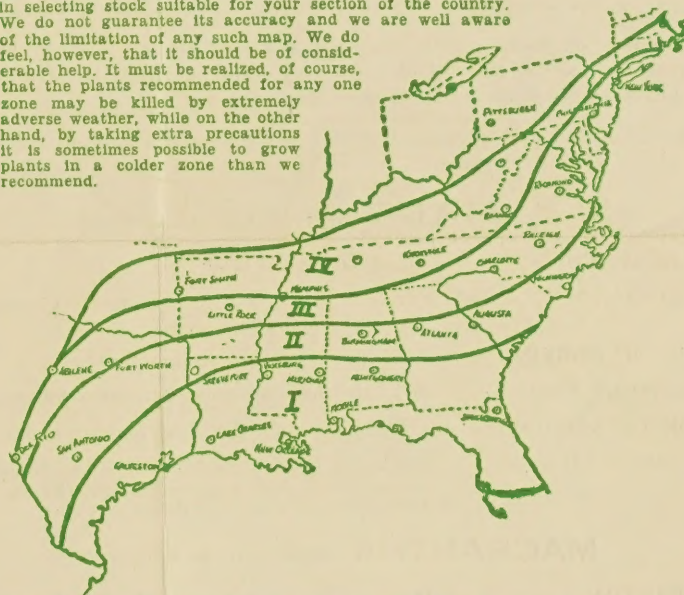

I. ALL OUR STOCK IS GUARANTEED TO ARRIVE IN GOOD CONDITION. We unconditionally guarantee all stock will arrive in good condition. Any of our stock may be returned within 7 days for full refund including return postage. All of our bulbs are guaranteed to sprout and any which do not may be returned for full refund.

### II. ALL OUR STOCK IS GUARANTEED TO GROW.

Any stock which dies within one year for any cause whatsoever will be replaced at half price. Any complaints under the terms of Section II of our guarantee should state the kind and number of plants which die and should include 50% of the original cost.

III. CERTAIN STOCK IS GUARANTEED TO BLOOM. This guarantee varies with the item.

This map is an attempt to divide the eastern section of the United States into climate zones to aid you in selecting stock suitable for your section of the country. We do not guarantee its accuracy and we are well aware of the limitation of any such map. We do feel, however, that it should be of considerable help. It must be realized, of course, that the plants recommended for any one zone may be killed by extremely adverse weather, while on the other hand, by taking extra precautions it is sometimes possible to grow plants in a colder zone than we recommend.

### ORDER BLANK CONTINUED

We never substitute when it is avoidable but we are occasionally sold out of an item which is ordered. If we are unable to fill your order exactly as it is written we will make the best substitution possible unless you instruct us otherwise. Satisfaction is guaranteed of course. If you prefer that we send you a refund instead of substituting check here ☐. If you have any special instructions on substitutions, please specify.

## AZALEAS

For massed display of brilliant color the azalea is unexcelled by any other shrub. Azaleas are easy to grow if you are careful to select hardy varieties for your climate and if you plant them in acid soil.

Our map on the reverse side is designed to aid you in selecting the best varieties for your location. Soil in most of the East and Southeast is already acid but if your local soil happens to contain too much lime this can be easily counteracted by the use of an acid fertilizer.

We are frequently asked when to plant Azaleas. In our opinion they will do much better if planted in the Fall provided you protect them from adverse weather until they become established. There are 2 important advantages of planting azaleas in the Fall.

1. The Fall plants which we ship are generally sturdier, stronger plants than are available at the same price in the Spring.
2. Plants planted in the Fall will survive a drought the following summer very much better than azaleas planted in the Spring.

We are now offering both 1st year and 2nd year plants. There is little difference in the size since both have been kept cut back, but the 2nd year plants are heavier rooted and have sturdier stems.

Many of the 2nd year plants will bloom this Spring. In general, the 1st year plants will not bloom until one year later.

### GIANT (ZONES I & II)

FIELDERS WHITE	The best giant white.
FORMOSA	Purple. Very drought resistant. Compact attractive dark green foliage.
PRIDE OF DORKING	Red. Grows rather compactly.
MOSS POINT ROSE	A lovely shade of rose. Attractive foliage.
PRIDE OF MOBILE	Watermelon red. Our most popular azalea.
SOUTHERN CHARM	Similar to Pride of Mobile, but more drought resistant and darker green foliage. Bloom is a little larger with a slight purple cast.

### MACRANTHA (ZONES II, III & IV)

MACRANTHA	Orange-red, compact, very hardy. Scattered blooms over a long period of time. This is a cold weather azalea. Does not bloom reliably in the Deep South.
-----------	---

### DWARF (ZONES I, II & III)

CORAL BELL	Coral Pink, double, hardy.
SNOW	White, compact, double, hardy.
FLAME	Brick-red, hardy, upright.

## BULBS— RANUNCULUS

We recommend these bright, cheerful flowers for fall planting in the South. Gay and colorful, they are a harbinger of Spring. Attractive in rock gardens, border plantings or beds for cutting. In the North Fall planting should be in pots or inside window boxes.

### IXIA—CORN LILY

Interesting bright colored flowers which grow on strong wiry stems. They are excellent for border work and cut flowers. The color range is lilac, mauve, orange, red and yellow.

## CAMELLIAS

The Aristocrat of Southern Gardens

We have the largest, healthiest, sturdiest Camellias that we have ever offered for sale in our regular catalog. Most of these camellias are plants which were left over from last year and they are a real bargain. Almost all of our Camellias have grown well this past year, but some of them are naturally larger and stronger than others. We are offering these extra heavy selected plants that are from 2 to 3 ft. tall for just 50c. Bed-run quality from 1½ to 2 ft. for 35c.

All of the first size will be branched and most of the 2nd size.

These plants are grown in open beds without the "benefit" of glass. They are a real bargain but they should not be confused with balled and burlapped field grown specimen plants.

Our planting directions have always advised you to cut back your Camellias when planting them out, but a recent check has indicated that very few of our customers actually do so. Camellias do much better if they are cut when they are moved and we strongly urge you to let us do this for you prior to shipping you the plants. Plants which are cut back are stubby in appearance and are less attractive upon arrival, however, they will grow much more readily and rapidly.

These plants will not bloom this season. Most of them will bloom next year or the year after.

**CAMELLIA SASANQUAS:** As camellias go, this specie is very hardy. Reports as to just how hardy are conflicting but it is our opinion that they may be grown in Zones I, II and III.

Sasanquas are not suitable for corsage work or cutting. They are hardier and freer blooming than the Camellia Japonicas and we recommend them for landscape use.

SNOW ON THE MOUNTAIN	Semi-double white. Very profuse. Our favorite
ROSEA	Large single flowers of brilliant pink.
SLENDERLEE	Watermelon pink, limber weeping foliage.
WHITE BUTTERFLY	White with pink blush. Single.
CLEOPATRA	Cherry red, single. Very compact growth. Dark green foliage.

**CAMELLIA JAPONICAS:** Where they can be grown, the Camellia Japonica is generally considered the most desirable specie of camellia. The blooms are very satisfactory for cutting and corsages.

PROFESSOR SARGENT	Large full double, dark red, ball shaped. Hardy, fast growing.
VICTOR EMANUEL	Very large, late blooming double dark red.
SARAH FROST	Full double, rose pink, flat bloom with a rosebud center.
HERME	Large free blooming semi-double pink and white. Color is very unusual and most attractive.

A MIMEOGRAPH SHEET LISTING RARE CAMELLIAS AT PRICES FROM \$1.00 UP AVAILABLE ON REQUEST.

## DUTCH IRIS

Our best buy in bulbs for Fall planting. For details see enclosed color circular.

### KING ALFRED DAFFODILS

The KING ALFRED DAFFODIL is truly a classic bulb that has stood the test of time. While interest in other bulbs rises and falls, the KING ALFRED DAFFODIL remains one of the outstanding bulbs throughout the world.

THE LARGEST SIZE AVAILABLE ANYWHERE AT ANY PRICE.

Bulbs averaging ½ lb. each, only 30¢ each — 10 for \$2.50
